

OSRAM STANDARD LINE 24V

A quality concept: OSRAM STANDARD LINE 24V.

The materials used in the construction of trucks are often pushed to the very limits. Truck drivers therefore have to rely totally on the quality of the various components. OSRAM STANDARD LINE 24V with its reliable performance is therefore the first choice for truckers.

Consistently safe and reliable.

Customers throughout the world place their trust in the performance of OSRAM STANDARD LINE 24V lamps. In contrast to other products, they combine absolutely reliable quality with a fair price. The performance of inferior quality lamps decreases over time, jeopardising the safety of the driver, possibly without the driver being aware of this. OSRAM STANDARD LINE 24V lamps continue to provide safe light until the end of their service lives, making them a balanced and economical solution for all standard requirements in the 24V sector.

All-round quality.

- Tried and tested brand quality.
- Excellent price/performance ratio.
- The lamps remain within the prescribed safety margins right to the end of their lives.
- Reliable standard all-rounder for price-conscious drivers.
