

OSRAM COOL BLUE®

## OSRAM COOL BLUE® – stylish and safe.

OSRAM COOL BLUE® provides powerful light on the road. Its stylish bright bluish white is almost in the same league as the light from attractive XENON lamps.

### Cool light, strong effect.

COOL BLUE® produces high-contrast light similar to natural daylight and is therefore easier on the eye than the light from conventional headlights. Its bright bluish white light has a colour temperature of up to 4000K, so it is not just an attractive lamp for style-conscious drivers it also puts many other "blue" lamps firmly in the shade. COOL BLUE® H7 and H4 lamps have an eye-catching design. Behind the clear glass the silver cap blends perfectly with the reflector.
