

OSRAM SILVERSTAR®

OSRAM SILVERSTAR® – more power, greater safety.

Drivers can rely on OSRAM SILVERSTAR® lamps as powerful night-time companions. When the sun goes down, light is a precious commodity – and SILVERSTAR® provides plenty of it.

Safety in the dark.

Long journeys at night call for full concentration on the part of the driver. A lamp with better illumination of the road will make driving easier and raise awareness considerably. Vehicles equipped with OSRAM SILVERSTAR® therefore have a crucial advantage in terms of safety. Up to 50 % more light on the road 50 to 75 m in front of the vehicle enables drivers to see road signs, obstacles and other dangers sooner so they can react in good time.

SILVERSTAR® speaks for itself.

- Up to 50 % more light on the road for greater safety.
- Up to 20m longer light beam, equivalent to four or five car lengths, giving extra reaction time.
- Modern design with silver cap, ideal for all clear-glass headlights (H4/H7).
- Meets the strict quality requirements of car manufacturers.
- The ideal family of lamps for active drivers.
