

OSRAM TRUCKSTAR®

The bright heavyweight among truck lamps: OSRAM TRUCKSTAR®.

At night, truck drivers need the best possible light on the road ahead. OSRAM TRUCKSTAR® is way ahead of conventional 24V lamps, allowing drivers to concentrate on the essential.

Twice as bright, twice as long.

Compared with conventional 24V lamps, OSRAM TRUCKSTAR® has a distinct advantage thanks to its patented single-coil technology. This results in up to 100% more light on the road¹⁾, making it much easier for long-haul drivers to concentrate – a massive benefit in terms of road safety. Their uniform light and a light beam up to 40m longer enable dangers to be seen much sooner and give drivers valuable extra time in which to react. OSRAM TRUCKSTAR® is capable of withstanding strong vibrations and also saves time and money thanks to its 100% longer life¹⁾.

Heavy artillery for greater safety.

- Up to 100% more light on the road thanks to patented single-coil technology (SC).
- Twice the life of conventional 24V lamps.
- Greater safety thanks to better illumination of the road.
- Lower costs thanks to reduced failure rates as a result of improved vibration resistance.
- OSRAM TRUCKSTAR® is a reliable companion for safety-conscious truck drivers.
